SUBJECT INDEX TO VOLUME I

A

Adipose lipoprotein lipase, hepatic lipogenesis and triglyceride removal in normotrigly ceridemic hexose fed rate, 189
Albumin,
serum, effect of anabolic steroids in athletes, 65
serum levels in adult humans, familial biochemical patterns, 313
Alkaline phosphatase, serum, effect of anabolic steroids in athletes, 65
Amino acid,
deficiency, dietary, effect on food intake of rats with hypothalamic lesions, 1
imbalance, dietary, effect on food intake of rats with hypothalamic lesions, 1
in serum of weanling rats, alterations during Vitamin B_{12} and folic acid deficiency, 49
Anabolic steroids,
diet, effect on blood lipids in elderly humans, 231
effect on blood chemistry profile, oxygen uptake and strength in athletes, 65,337
D-Araboascorbic acid, (Isoascorbic acid), antiscorbutic properties in guinea pigs, 275
Arginine, essentiality for the growing rabbit, 57

B

Bilirubin, total in serum, effect of anabolic steroids in athletes, 65
Biotin, and zinc interrelationship in weanling rats, 11
Bovine and rat livers, 5-hydroxyindole production, 343

C

Calcium, in serum, effect of anabolic steroids in athletes, 65
Cereal-legume, evaluation of blend to be used in a nutrition improvement program, 325
Chicks, with induced hyperthyroidism, a comparison of cystine and methionine as dietary supplements, 25
Cholesterol,
in adult rat blood, effect of exogenous lipid restriction, 139
in adult rat tissues, determination, 147
effect of diet and anabolic steroids in elderly humans, 231
Choline deficiency, in young rats, effect on distribution of total lipid phosphorus, 377
Colombia, working class families, improvement in nutritional efficacy of food expenditure by changes in food purchase patterns, 207

Corn, improvement of protein value by supplementation with limiting amino acids, 297
Cows, vitamin binding by plasma proteins, 161
Cystine, compared with methionine, as a dietary supplement in chicks with induced hyperthyroidism, 25

D

Diet,
adequate purified, for rabbits of all ages, 35
and anabolic steroid administration, effect on blood lipids in elderly humans, 231
improvement of nutritional value by more efficient expenditure for food among Colombian families, 207
poor Indian, effect of supplementary low-cost protein food on, 19
Dogs, vitamin binding by plasma proteins, 161

E

Enzymes, see also individual enzymes

F

Fat, dietary, effect on fatty acid composition of turkey egg yolks, 83
Fatty acids,
composition of turkey egg yolks, effect of dietary fat, 83
effect of diet and anabolic steroids in elderly humans, 231
free, dietary, influence on lipid metabolism in young rats, 181
Fish protein concentrate, in cookies as a substitute for skim milk in a school feeding program, 291
Folic acid, deficiency in weanling rats, effect on serum amino acids and liver composition, 49
Food intake, of rats with hypothalamic lesions, effect of amino acid imbalance and deficiency, 1

G

Glucose, blood, effect of anabolic steroids in athletes, 65
Glutamic acid, effect on blood and brain levels in weanling rats of monsodium glutamate, 131
Guinea pigs, effect of D-araboascorbic acid in preventing scurvy, 275

H

Hamsters, weanling, toxic effects of dietary selenium, 175

Hens,
laying, effect of level and source of phosphorus, 95
turkey, effect of dietary fat on the fatty acid composition of egg yolks, 83
_____, relationship of protein level to reproductive performance in two strains, 353
Horses, vitamin binding by plasma proteins, 161
5-Hydroxyindole, production in liver of bovine and rats, 343
Hyperthyroidism, induced in chicks, a comparison of cystine and methionine as dietary supplement, 25
Hypothalamic lesions, in rats, effect of amino acid imbalance and deficiency on food intake, 1

I

Isoascorbic acid, antiscorbutic properties in guinea pigs, 275

K

3-Ketosteroids, in adult rat tissues, determination, 147

L

Lactic dehydrogenase,
serum, in adult humans, familial enzymic patterns, 125
_____, effect of anabolic steroids in athletes, 65
Lipid restriction, exogenous, effect on adult rat blood and adipose tissue steroids, 139
Lipogenesis, hepatic, adipose lipoprotein lipase and triglyceride removal in normotriglyceridemic hexose-fed rats, 189
Lipoproteins, in animal and human plasma and vitamin binding capacity, 161
Liver,
alteration in composition in weanling rats during Vitamin B_{12} and folic acid deficiency, 49
-5-hydroxyindole production in bovine and rats, 343
phospholipids, in choline deficiency in rats; distribution of total lipid phosphorous, 377
Lysine,
essentiality for the growing rabbit, 57
supplementation, effect on protein value of a poor Kaffir corn diet in weanling rats, 297
_____, effect on protein value of a poor rice diet in weanling rats, 113
_____, effect on protein value of a poor wheat diet in weanling rats, 169

M

Malnutrition, editorial: Where are the malnourished ?, 267
Mental illness, metabolic aspects and interrelationships of methionine and tryptophan, 243
Metabolism,
lipid, influence of dietary free fatty acids in rats, 181
in obese subjects, (Review), 197
Methandrostenolone, effect on blood chemistry profile, oxygen uptake and strength in athletes, 65, 337
Methionine,
compared with cystine, as a dietary supplement in chicks with induced hyperthyroidism, 25
effect of excess on tryptophan metabolism and behaviorial implications, 243
essentiality for the growing rabbit, 57
supplementation, effect on protein value of a poor Kaffir corn diet in weanling rats, 297
_____, effect on protein value of a poor rice diet in weanling rats, 113
_____, effect on protein value of a poor wheat diet in weanling rats, 169
Monsodium glutamate, effect on blood and brain levels of glutamic acid in weanling rats, 131
Muscle strength, effect of anabolic steroids in athletes, 65

O

Oxandrolone, and diet, effect on blood lipids in elderly humans, 231
Oxygen uptake, effect of anabolic steroids in athletes, 65

P

Pectin and algin, effect on protein utilization, digestibility of nutrients and energy in young rats, 367
Phenylalanine,
/tyrosine ratio, as an index of phenylalanine hydroxylase activity in infant rats, 105
and vitamins A and E, influence on plasma phenylalanine, liver phenylalanine hydroxylase activity and brain serotonin in weanling rats, 281
Phenylketonuria, temporary induction of the characteristics in infant rats, 105
Philippines, use of a rice-bean blend to improve protein nutrition, 325

Phosphorus,
effect of level and source in laying hens, 95
inorganic in serum, effect of anabolic steroids in athletes, 65
lipid, distribution in choline deficiency in rats, 377
Pigs, vitamin binding by plasma proteins, 161
Protein efficiency ratio,
in weanling rats, effect of limiting amino acid supplementation of a poor corn diet, 297
_____, effect of limiting amino acid supplementation of a poor rice diet, 113
_____, effect of limiting essential amino acid supplementation of a poor wheat diet, 169
_____, effect of supplementary yeast to poor rice and ragi diets, 305
Protein,
in animal plasma, and vitamin binding capacity, 161
in human plasma, and vitamin binding capacity, 161
level and reproductive performance of turkey hens, 353
quality, in weanling rats, of selected lines of sorghum vulgare, 75
total in serum, effect of anabolic steroids in athletes, 65
utilization, effect of pectin and algin in young rats, 367
value, improvement in a poor corn diet by supplementation with limiting amino acids, 297
_____, improvement in a poor rice diet by supplementation with limiting essential amino acids, 113
_____, improvement in a poor wheat diet by supplementation with limiting essential amino acids, 169

R

Rabbits,
growing, evaluation of the essentiality of arginine, lysine, and methionine, 57
of all ages, adequate purified diets, 35
vitamin binding by plasma proteins, 161
Rats,
adult, determination of tissue sterols and 3-ketosteroids, 147
_____, effect of exogenous lipid restriction on blood and adipose tissue steroids, 139
_____, with hypothalmic lesions, effect of amino acid imbalance and deficiency on food intake, 1
and bovine levels, 5-hydroxyindole production, 343
growth and nitrogen balance, as criteria for evaluating efficacy of a rice-bean blend in the Philippines, 325
infant, temporary induction of phenylketonuria-like characteristics, 105

normotriglyceridemic, effect of hexose feeding on hepatic lipogenesis, adipose lipoprotein lipase and triblyceride removal, 189
weanling, effect of deficient or normal zinc diet with added biotin on alopecia dermatitis, muscle strength and growth, 11
_____, effect of monosodium glutamate on blood and brain levels of glutamic acid, 131
_____, effect on PER by supplementing a poor Kaffir corn diet with limiting amino acids, 297
_____, effect on PER by supplementing a poor rice diet with limiting essential amino acids, 113
_____, effect on PER by supplementing a poor wheat diet with limiting amino acids, 169
_____, effect of protein quality of selected lines of sorghum vulgare on growth, nitrogen deposition and digestibility, 75
_____, influence of phenylalanine and vitamins A and E on plasma phenylalanine, liver phenylalanine hydroxylase activity and brain serotonin, 281
young, alterations in tryptophan metabolism by excess dietary methionine, behavorial implications, 243
_____, choline deficient, distribution of total lipid phosphorus, 377
_____, effect on growth, by supplementing a poor Indian diet with a low cost protein food, 19
_____, effect of pectin and algin on protein utilization, digestibility of nutrients and energy, 367
_____, effect on PER of yeast grown on petroleum hydrocarbons added to poor rice and ragi diets, 305
_____, influence of dietary free fatty acids on lipid metabolism, 181
Reproductive performance and protein level of large and small white turkey hens, 353
Rice-bean blend, for use in a nutrition improvement program evaluation by rat growth and nitrogen balance, 325
Rice, improvement of protein value by supplementation with limiting amino acids, 113
Rice and ragi, supplementary effect of yeast grown on petroleum hydrocarbons in rats, 305

S

Scurvy, effect in guinea pigs of D-araboascorbic acid, 275
Selenium, dietary, toxic effects in weanling hamsters, 175
Sheep, vitamin binding by plasma proteins, 161
Sorghum vulgare,
effect of protein quality on growth, nitrogen deposition and digestibility in weanling rats, 75
improvement of protein value by supplementation with limiting amino acids, 297

Steroids, in adipose tissue of adult rats, effect of exogenous lipid restriction, 139
Sterols,
in adult rat tissues, determination, 147
in blood of adult rats, effect of exogenous lipid restriction, 139

T

Threonine,
supplementation, effect on protein value of a poor Kaffir corn diet in weanling rats, 297
_____, effect on protein value of a poor rice diet in weanling rats, 113
_____, effect on protein value of a poor wheat diet in weanling rats, 169
Transaminase, (SGOT),
serum, in adult humans, familial enzymic patterns, 119
_____, effect of anabolic steroids in athletes, 65
Triglyceride removal, hepatic lipogenesis and adipose lipoprotein lipase in normotriglyceridemic hexose-fed rats, 189
Tryptophan metabolism, alteration by excess methionine and behavioral implications, 243

U

Urea nitrogen effect of anabolic steroids in athletes, 65
Uric acid, serum, effect of anabolic steroids in athletes, 65

V

Vitamin,
A and E, and phenylalanine, influence on plasma phenylalanine, liver phenylalanine hydroxylase activity and brain serotonin in weanling rats, 281
binding, by human and some animal plasma proteins, species differences, 161
B_{12}, deficiency in weanling rats, effect on serum amino acids and liver composition, 49

W

Wheat, improvement of protein value by supplementation with limiting amino acids, 169

Y

Yeast, supplementary value to poor rice and ragi diets in rats, 305

Z

Zinc, and biotin interrelationship in weanling rats, 11
